Scroll down for the direct link to FOCUS (only works for Parent logins; students must log in via Launchpad)

Instructional Continuity Plan

Secondary Leading and Learning

All teachers will post assignments on their FOCUS account. This will allow for parents and students to easily track expectations for student achievement. The student's teacher is the best line of contact for any questions about an assignment or digital platform. School counselors, social workers, IEP case managers, and administrators will continue to support students, parents, and teachers to ensure the best possible education during this emergency. If none of those avenues have worked and a student, parent, or teacher is feeling frustrated, please contact the [Administrative Assistant for Secondary Leading and Learning - Kathy Whittle](#), she will ensure that your concern is addressed by the correct person. As you can imagine, email will be the most powerful tool for communication during this crisis. Please be sure to check email with increased frequency. Finally, many of our school staff will be using digital calling tools - I know many of us have stopped taking calls from unknown numbers. Please try to be flexible on this habit as you will likely be getting important calls from unknown numbers.

FOCUS Website or APP

The FOCUS website or APP is the home base for all students, parents, and teachers. On the website, the calendar link (towards the bottom) is a great tool to see a full calendar of assignments. In the APP select planner to see all pending assignments (Effective March 30th)

A student's full academic history to include all assessment results is also available when using the FOCUS website. Parents - please direct any questions about access to the school - students all practiced accessing the site prior to Spring Break. Teachers, if you run into any barriers, please contact your school assigned Tech Integrator.
