

CTE-CHOICE Dual Enrollment

1. How does the dual enrollment program work? Does a student take college classes while still attending high school?

Dual enrollment is a partnership between Brevard Public Schools and Brevard Community College (BCC) that allows eligible high school students the opportunity to attend certain postsecondary courses and earn college level or certificate credit while simultaneously being enrolled in high school. Under this program dual enrollment students will not be charged for college tuition or books.

Provided a student meets the required GPA, he/she may work towards an Associate in Science degree, Technical Certificate, or a Postsecondary Adult Vocational certificate (PSAV) in a variety of programs. Students earn both high school elective credit and postsecondary credit for each course. Many vocational dual enrollment courses are offered on a high school campus. Students should see their high school counselor and review the BCC catalog or web site for more information.

2. Does Dual Enrollment apply only to CTE-CHOICE programs/courses?

No. Dual Enrollment courses are offered within a number of categories. Students should visit their high school guidance counselor to determine the specific courses within the many A.S. or Technical Certificate programs.

3. How can students learn about which classes are offered in the Vocational Dual Enrollment program?

Students should review the BCC catalog and contact their high school guidance counselor or Janice Scholz at Brevard Public Schools, Office of CTE at 321-633-1000 ext. 384.

4. When can a student enroll in Dual Enrollment? Who is eligible for dual enrollment?

Tenth, eleventh and twelfth grade students can enroll in a dual enrollment program, provided they meet the GPA eligibility and application requirements. Qualified seniors who have completed all required courses for graduation during the first semester could attend BCC full-time in January.

The state unweighted cumulative GPA requirements vary for various programs:

- 2.5 for Associate in Science Degree
- 2.0 for Vocational Certificate

Students must also obtain a recommendation from the high school counselor, obtain approval from the high school principal, obtain approval from a parent or guardian, and take the required assessment tests.

5. Is there a limit to how many college credits a student can earn through Dual Enrollment while attending high school?

Yes. See your guidance counselor for specific details.

6. Will students enrolling in a vocational dual enrollment (A.S. Degree or Vocational Certificate) course(s) on a BCC campus be required to fill out a CTE-CHOICE application.

No, students enrolling in BCC for vocational dual enrollment courses on the BCC campus do not complete CTE-CHOICE applications.
