Woods Cross City Water Tank Replacement Project

Important Construction Notice

Woods Cross City will be beginning construction on a new 1.5-million gallon water storage tank starting around September 28, 2026. This important infrastructure project will help ensure a reliable and resilient water supply for the Woods Cross community for years to come.

Project Scope

The project includes:

- Demolition and removal of the existing two water tanks
- Excavation and site preparation
- Construction of a new 1.5-million-gallon water storage tank
- Site restoration and final improvements

Project Timeline

- **Construction Start:** September 2026
- **Estimated Duration:** Approximately 14 months
- **Expected Completion:** Fall 2027

What Residents Can Expect

To support construction activities, residents may notice increased activity in the project area throughout the duration of the project.

Construction impacts may include:

- Increased truck traffic, with up to 20 truck trips per day entering and exiting the site
- Noise from construction equipment and hauling operations
- Ground vibrations associated with demolition and excavation activities
- Temporary increases in dirt, dust, and other construction-related disturbances

The construction team will make every effort to minimize impacts and maintain a safe work environment for residents and motorists
