

# Getting Started With Rooms?

Here are our **top three Rooms tips** for guardians.

## Top tips for guardians

### 1. **Customize your notifications preferences.**

First, make sure to turn on Push Notifications after downloading the school app. That way you're always notified when you receive messages from your students' teachers, coaches, and counselors. If you'd like to receive more notifications, you can visit your account settings and turn on Hourly Email Notifications and the Daily Digest feature. These are just a few ways to ensure you're always connected to your child's school.

### 2. **Get acquainted with all of the different Rooms features.**

Browse through the Class Info section to view any new school supply lists, lesson plans, office hours, and more! Then, read through recent Announcements to stay up-to-date with what is happening in the classroom.

### 3. **Reach out to your child's teachers.**

Above all else, establish a great rapport with your child's teachers. Your involvement in their education is invaluable. By fostering open lines of communication, you can play a pivotal role in enhancing their education journey. Whether it's to discuss progress, address concerns, or simply stay informed, reaching out to teachers can lead to a deeper understanding of your child's academic needs and strengths.
