WHAT WE'RE LEARNING

VPK (age 4)

Our VPK program prepares children for kindergarten through fun, hands-on learning experiences that build early literacy, math, social skills, and independence.

HEAD START(age 3 - rising 5)

Our Head Start program provides children with a strong foundation for lifelong learning. Through engaging educational activities, social-emotional development, and family support, we help every child thrive academically, socially, and emotionally in a nurturing enriching environment.

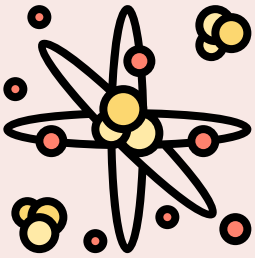

LIFT AND LEARN (age 3)

Our Lift and Learn program provides children with engaging, hands-on learning experiences that nurture curiosity, build essential skills, and encourage early academic success. Through interactive activities and individualized support, we empower every child to grow, explore, and reach their full potentional.

SCHOOL ACTIVITIES

1 Hands on STEM

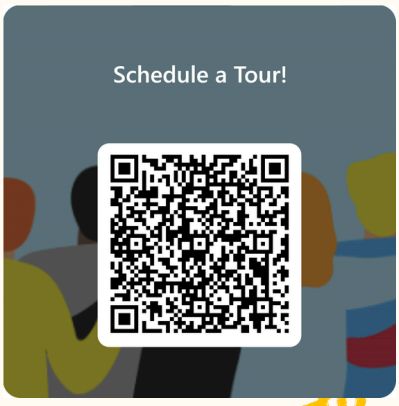

Our hands-on STEM includes robotics that inspire young minds through exciting opportunities to explore science, technology, engineering, and math.

2 Gardening

Our garden gives children a hands-on experience in the wonders of growing fresh vegetables. With the help of our farmer, children explore how food grows, discover healthy eating habits, and enjoy tasting fresh produce.
