

Alta Loma School District

Annual Parent Notification

Dangers of Synthetic Drugs

This notice is provided in compliance with Education Code § 48985.5:

“A local educational agency shall inform the parents or guardians of each enrolled pupil about the dangers associated with using synthetic drugs, counterfeit pills, and the role of social media platforms in selling these substances.”

What Parents & Guardians Need to Know

Alta Loma School District is committed to protecting the health and safety of every student. As required by California Education Code § 48985.5, we are providing the following important information regarding synthetic drugs, including fentanyl:

Dangers of Synthetic Drugs

- Synthetic drugs, including fentanyl, that are not prescribed by a doctor can be extremely dangerous or fatal, even in small doses.
- Counterfeit pills—which look like real medication—may contain lethal synthetic drugs like fentanyl.
- Social media platforms are increasingly being used to market and sell these substances to youth in deceptive and dangerous ways.

When You'll Receive This Info

- Provided annually at the beginning of each school year (first semester or quarter)
- Available online on the Alta Loma School District website and on each school site's webpage

Where to Find More Information

Visit: www.alsd.k12.ca.us

Each school's individual website will also post this notice.

Our Commitment

We urge all families to:

- Talk with your children about the risks of drug use
- Stay alert to online activity and peer influences
- Reach out for help or support if you suspect drug use or exposure
