

Professional Development Inclement Weather Protocol

Professional Development Inclement Weather Protocol
Approved by the Chief Academic Officer

All Cumberland County sponsored professional development activities are canceled under the following conditions:

- When school is closed for students and staff
- When school is closed early for students
- When after school activities are canceled

If the canceled professional development activity is one of several meetings, the class will resume on the next scheduled date and any rescheduling details will be shared by the presenter at that time.

If the canceled professional development activity meets for only that date, the information will be sent from the department sponsoring the activity with the rescheduling information.

When school opening is delayed:

- The point of contact for the professional development activity will be responsible for communicating with the Professional Development department, presenters, and attendees regarding the new start time or cancellation.
- Times should be based on county directives for employees. If a new start time is given, the end time remains the same. Extensions may be granted based on availability.

Thank you for your continuous support of staff development.
