34 responses

You’re doing great!
Continue to support staff and students in all areas.
Better communication from coaches on travel, itinerary, hotel stay, etc.
Hold teachers and school board members accountable of their actions
Being fair to every one no madder their appearance
Please treat all students with the same level of respect and meaning.
Please treat all students with the same level of respect and meaning.
@its core, learning is a skill best practiced in its primitive years. Yelling & mutee threats do not beget a positive outcome.
When any student feels bullied or unsafe the incident needs taken seriously and addressed immediately with consequences not just “talk to them” but immediate consequences.
Same standard of behavior for all
Personal feelings towards parents to not be taken out on children. Understanding that concern are learning and developing and not all are textbook children.
A few teachers are not fair across the board. They have their favorite students and the ones that may require a little extra help or may not be the “it” family then they don’t get treated well and talked down to.
@its core, learning is a skill best practiced in its primitive years. Yelling & mutee threats do not beget a positive outcome.
“Keep the main thing the main thing.”
That every student is given the same consideration and encouragement, regardless of learning ability, athletic performance or social standing.
Get rid of 2-3 elementary teachers, that don’t do their job! They need to have surprise visits.

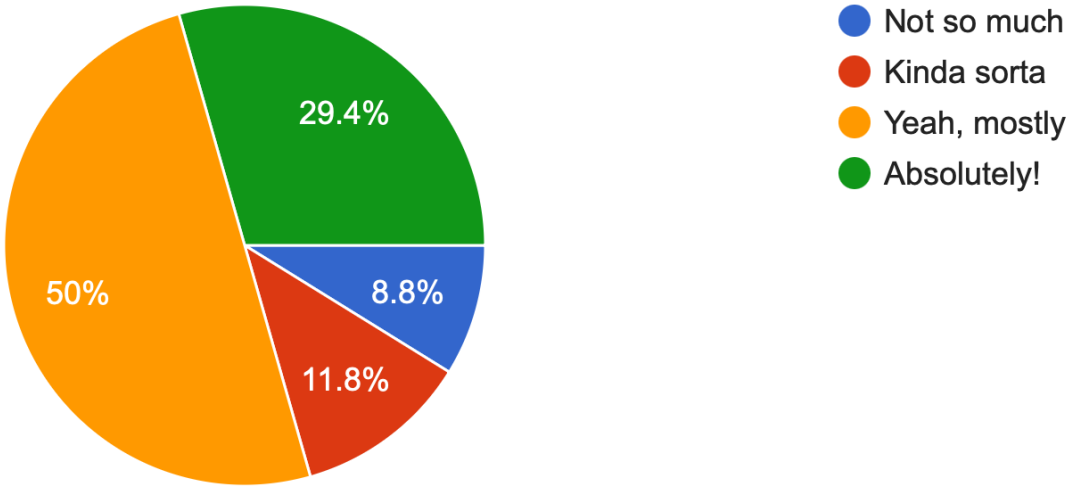

Optimal LEARNING is the basis for decisions made by the JGISD Board of Trustees and administration.

34 responses

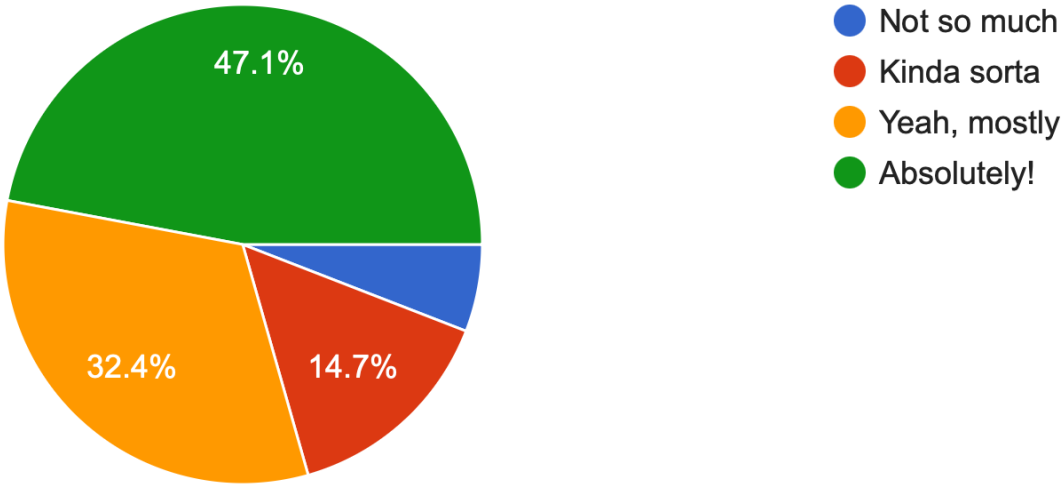

JGISD focuses on development of the WHOLE child – intellectually, physically, and socio-emotionally.

34 responses

Excellence is the expectation for both students and employees of JGISD.

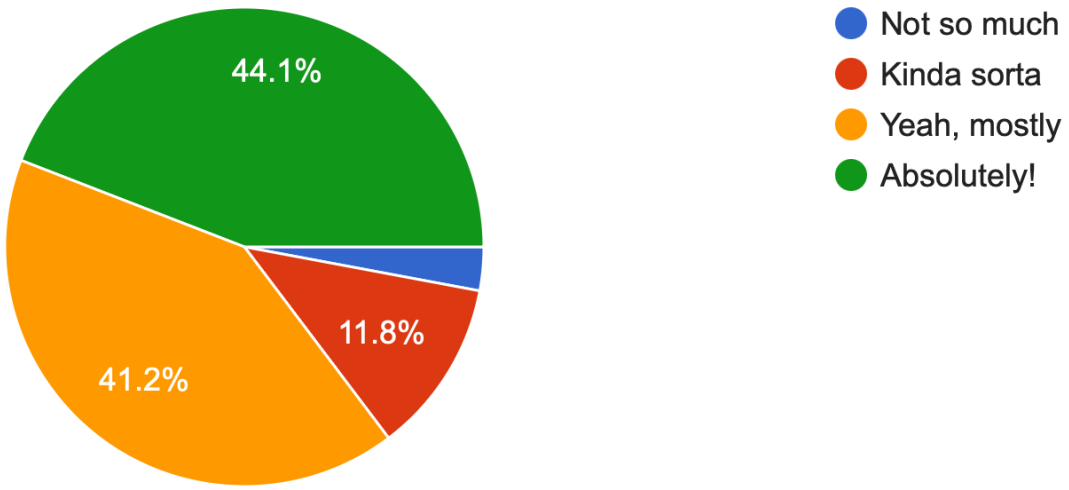

34 responses

Focus more on the classroom and less on the extracurricular events going on.
We need more vocational programs for our students.
CAD and drafting classes that are not tied to robotics.
Hold teachers accountable for actions
Focus on things that matter
Have higher classroom expectations of our older students throughout the entire year.
Have higher classroom expectations of our older students throughout the entire year.
I think they do a great job in optimizing on latest technology, & resources optimization.
Not having personal feeling/pride about teaching and taking in outside help that could better the students.
I think they do a great job in optimizing on latest technology, & resources optimization.
As a student I feel as if our education and preparedness for after high school is not prioritized.
Offering classes for graduating with skills, certifications
More vocational options, incorporating art, improving autism resources (partnering with Burkhaulter Center), phonics implementation in early grades has been crucial- but what can be done to improve reading/ writing for the older kids who did not have phonics integrated curriculum ? Also more hands on learning, less computer. Involve parents in the early decisions in 7th and 8th grade about Spanish class options- we should be ankle to discuss with our children what is best for them and not be left in the dark not even knowing that there are multiple Spanish options. And what I believe is so important - in person dual credit. I believe it is far superior to online learning for this age and with as many masters prepared teachers as we have, I don't see any reason we shouldn't be doing it.
A school's primary responsibility is preparing students for life after graduation. Athletics and facilities have value, but they should not take precedence over academic, career, and personal development. Many schools offer a variety of vocational and technical programs that give students real-world skills and career opportunities before they graduate. How is JGISD preparing students for their futures? How many graduates are attending college, completing trade programs, serving in the military, or entering successful careers? These are the outcomes our community should be measuring and discussing alongside athletic achievements and facility improvements.
Don't build the baseball field
More focus academics, instead of sports. Graduates when they leave they're gonna be in a root of weakness because they're not gonna be the hero and they're gonna have to learn how to function.All they focus on JGISD is sports. Don't get me wrong I'm not against sports, but it is definitely not my top priority. Seems like all they improve. Has something to do with sports a new gym a new track a new field.

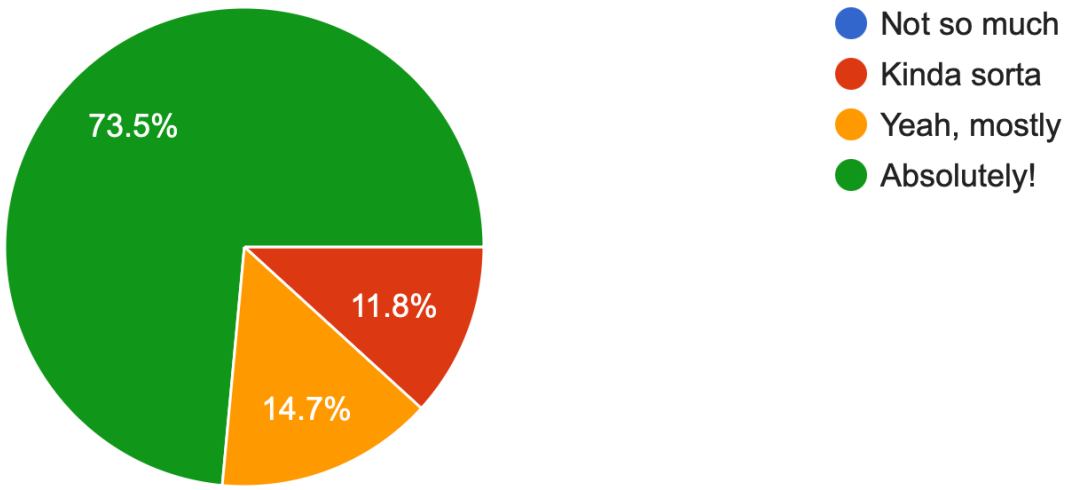

The JGISD culture is one that is relentlessly focused on continuous improvement.

34 responses

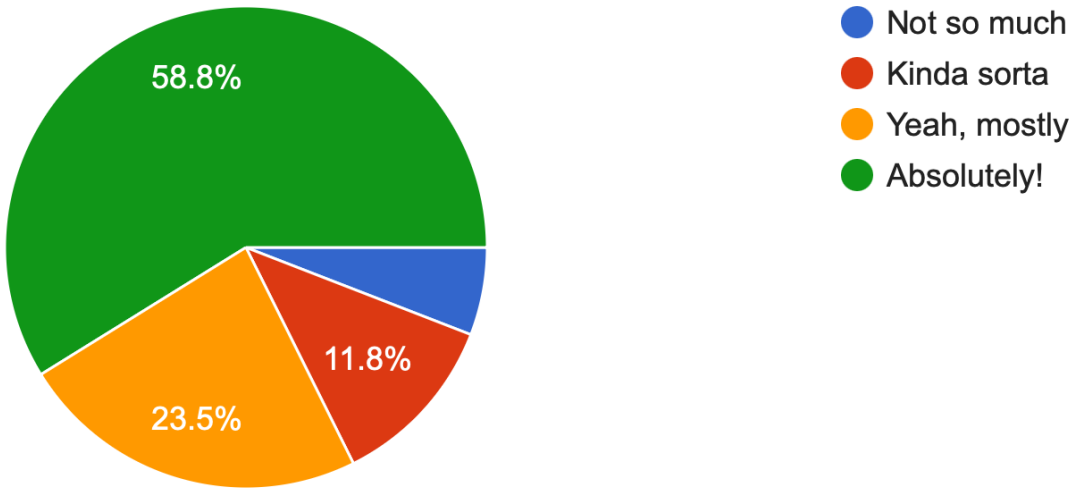

JGISD facilities are well-maintained, neat, and clean.

34 responses

The JGISD website is well-organized and easy to navigate.

34 responses

We need to improve on giving students the opportunity to obtain certifications in vocational fields upon graduation.
Improved information on scholarship deadlines, college career path options, ACT/SAT testing, ETC.
Do things right
Eliminate cell phone use throughout the school day and provide more learning opportunities for the students.

Kent county voters did not support the bond to build a baseball/softball complex and the board of trustees voted to build it anyway. The board should respect the opinions of the whole community.

Not all incentive to learn should be a competition
Consistent communication.
A school’s primary mission is to prepare students for success after graduation. While athletics and facilities are important, student readiness for college, careers, and life should always come first.
Don’t build the baseball field
We have several good teachers at Jayton-Girard ISD, even though we need to look into a couple of them elementary that don’t really care about their job. We have some great admin right there at Jane Girard at this time. Hope that continues. Seems like I’ll be focused on sports. Probably need to get rid of the coaches and start over the current coaches feel like they rule the school and they spend what they want. I believe they need to try to get all kids involved in the academics not just because who you are or how good you are in football or basketball or etc. We do have good kids. And we do have some good teachers.
