

HB2 Certification Timeline and Plan

Annually, CBISD will seek certified teachers for all core subjects, including those currently filled with District of Innovation Permittees. If no certified teachers are found, the position may be offered to District of Innovation Permittees.

CBISD Campus Administration and Human Resources department collaborate to provide ongoing support to DOI permittees in obtaining their teaching certification. CBISD will also continue the Registered Apprentice Program to certify new teachers and build a continuous teaching pipeline.

Any Alternative Certification or District of Innovation permittees will be reviewed annually by CBISD District and Campus administrators for progress towards certification before contracts are extended.

Campus Administrators may choose to move certified staff from another assignment to fill a core subject position.

By the 2029-2030 school year, CBISD will aim for 100% compliance for certification in all core subjects, K-12.
