FOR IMMEDIATE RELEASE

ERLANGER, KY – The Ignite Institute is hosting an Open House for 8th graders interested in attending during the 2027-28 school year. There are two options of sessions for students and their families to attend, starting at either 12:30 or 1:30. Families can register to attend at the school website, www.IgniteInstitute.org

At Ignite Institute, the guiding motto is simple: **"Care First, Then Teach."** It is more than a slogan; it is the foundation of a school culture that prioritizes relationships, student success, and preparing young people for life beyond high school.

The results speak for themselves.

Ignite Institute continues to demonstrate what is possible when high expectations are paired with meaningful relationships and opportunities for students. Last year alone, Ignite graduates earned **100 associate degrees**, while one student went a step further by earning a **bachelor's degree before graduating from high school**. Among those earning associate degrees were students with Individualized Education Programs (IEPs), demonstrating that with the right support, high expectations, and access to opportunity, all students can achieve at remarkable levels.

The graduating class also included **two students who became millionaires by the age of 21**, demonstrating the entrepreneurial spirit, ambition, and real-world skills fostered within the Ignite community.

Academically, Ignite Institute is among the state's leaders, boasting one of the highest postsecondary graduation rates in Kentucky and consistently ranking among the **top five schools in state testing**.

But Ignite's success cannot be measured by academics alone.

More than **230 seniors participate in internships**, gaining valuable hands-on experience and connecting classroom learning to real-world careers. Students are encouraged to explore their interests, discover their talents, and pursue opportunities both inside and outside the classroom. Whether taking the lead in a school production, performing on stage, competing in high school athletics, or preparing for a professional career, Ignite students are encouraged to get involved, take risks, and find their place.

Perhaps the most meaningful measure of Ignite's success comes directly from its students. When asked about their experiences, students shared:
"Teachers really show they care and want you to succeed."
"Staff makes you feel heard and will help you whenever you need it."

These comments reflect the philosophy that drives the Ignite experience. Educators understand that students are more likely to learn, grow, and achieve when they know someone believes in them and is invested in their future.
