

PUBLIC NOTICE

Beginning today, March 11th, 2026, around noon, crews will begin blasting work at the Tractor Supply construction site. This work is expected to continue periodically through the end of next week.

Residents and businesses in the nearby area may hear loud noises during blasting times. For reference, the maximum sound that could be experienced in the vicinity may be similar to a 9mm gunshot.

While this may be noticeable, the blasting will be conducted underground, so there will be no visible explosions.

Police Chief Tetter will be on site around the start time today to ensure everything is operating safely and as expected.

In addition, seismic monitors have been installed in areas extremely close to the site to measure and monitor vibrations.

Citizens in the immediate vicinity may experience brief sound disruptions during blasting periods.

If you are in the area and hear a loud noise during the day, please know it is related to this planned construction activity.

We appreciate everyone's patience as this work takes place.

Start Date: Wednesday, March 11th, 2026
