CHOICE PROGRAMS

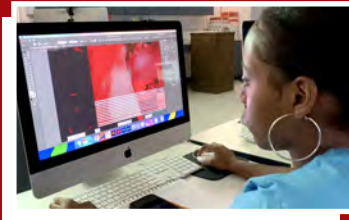

Business Entrepreneurship Academy

The Business Entrepreneurship Academy gives students the opportunity to develop leadership, business, and entrepreneurial skills through hands-on learning. Students explore marketing, finance, business management, and innovation while learning how to turn ideas into successful ventures. This program builds confidence, creativity, and real-world skills that prepare students for college, careers, and future business opportunities. Whether fostering the growth of startups or nurturing the spirit of innovation within established industries, the Business Entrepreneurship Academy guides students towards a future of self-reliance, innovation, and impactful leadership in the world of business.

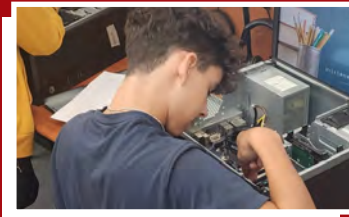

Collision Repair & Paint Refinishing

The Collision Repair & Paint Refinishing program gives students hands-on experience restoring and customizing vehicles in a real-world shop environment. Students learn industry skills such as collision repair, paint application, refinishing, and vehicle restoration while working with professional tools and equipment. Combining creativity with technical expertise, this program prepares students for rewarding careers in the automotive industry and provides valuable skills that can lead directly to employment or advanced training.

Commercial Art & Design Academy

"CADA" gives creative students the opportunity to turn their artistic talent into real world skills. Whether your dreams involve becoming a skilled cartoonist, a visual storyteller for digital media and print, graphic design, or a visionary in the realm of computer generated art, our academy provides the tools, mentorship, and environment to transform aspirations into reality. Students explore graphic design, digital illustration, branding, and computer generated art while building a professional portfolio. Through hands on projects and industry focused learning, they develop creativity, technical expertise, and problem solving skills that prepare them for exciting careers in graphic design, digital media, advertising, and the creative arts.

Computer Systems Technology/CISCO Academy

The Computer Systems Technology / Cisco Academy prepares students for the fast-growing world of information technology through hands-on learning and real-world problem solving. Students learn how to build, repair, troubleshoot, and secure computer systems while gaining experience with networking and industry-standard technology. This program develops valuable technical skills, critical thinking, and teamwork, providing a strong foundation for college, industry certifications, and high-demand careers in information technology and cybersecurity.

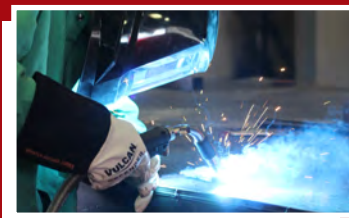

Culinary Arts

The Culinary Arts program gives students hands-on experience in the exciting world of food preparation, hospitality, and restaurant operations. Students learn essential cooking techniques, menu planning, food safety, and customer service while working in a professional kitchen environment. Beyond the kitchen, they explore the business side of the industry, including management, marketing, and entrepreneurship. This program helps students develop creativity, teamwork, and leadership skills while preparing for college, industry certifications, and rewarding careers in the culinary and hospitality fields.

Navy Junior Reserve Officers Training Corps (NJROTC)

The Navy Junior Reserve Officers Training Corps (NJROTC) program helps students develop leadership, confidence, and character through hands on activities and real-world experiences. Students build valuable skills in teamwork, communication, responsibility, and decision-making while learning the importance of service, integrity, and self discipline. Through leadership training, community involvement, and personal growth opportunities, NJROTC prepares students for success in college, careers, and life, empowering them to become confident leaders both in and out of the classroom.

Welding Technology

The Welding Technology program gives students hands-on training in one of the most in-demand skilled trades. Students learn industry standard welding techniques, including MIG, TIG, and Stick welding, while gaining experience in metal fabrication, cutting, and blueprint reading. Through real-world projects, they develop precision, problem-solving, and technical skills that prepare them for high-paying careers in manufacturing, construction, and industrial trades. This program provides a strong foundation for industry certifications, advanced training, and immediate career opportunities after graduation.
