BUILT BLUE

Stronger Together

Great Schools. Strong Community. Bright Futures.

Every Student.
Every School.
BUILT BLUE.

ALUMNI SPOTLIGHT:
JOCELYN DELCID

CLASS OF 2020

For Jocelyn Delcid, a 2020 graduate of Woodbridge High School, being Built Blue means working hard, continuing to grow, and using the lessons she has learned to make a difference in the lives of others. Today, those values are at the heart of her career as a registered nurse.

CARING FOR OTHERS THROUGH NURSING

Delcid has worked as a registered nurse for more than two years and currently serves patients on a medical-surgical floor in a hospital. In her role, she cares for individuals experiencing a variety of health conditions and supports them through what can often be a difficult and uncertain time.

What Delcid finds most rewarding about nursing is the opportunity to care for others and witness their progress. Seeing patients heal, improve, and, when possible, return home to their families gives special meaning to the work she does each day.

WOODBRIDGE MEMORIES THAT LAST A LIFETIME

Delcid remembers her years at Woodbridge fondly, particularly the variety of classes that helped shape her high school experience. English, math, Animal Science, and Early Childhood Education stand out as courses she found both educational and enjoyable.

Just as meaningful were the teachers who made those experiences possible. Delcid remembers instructors who genuinely cared about their students and dedicated themselves to educating, encouraging, and supporting them.

Woodbridge also holds a particularly special place in her personal story—it is where she met her husband. The two have been together since high school and have now been married for three years.

LESSONS THAT CONTINUE TO GUIDE HER

Among the most important lessons Delcid carried with her from Woodbridge is the importance of remaining open-minded and always being willing to learn something new. She also learned that reaching meaningful goals requires hard work, effort, and perseverance.

Those lessons have become especially valuable in her nursing career, where learning, adapting, and working hard are essential parts of providing quality care to others.

WHAT IT MEANS TO BE BUILT BLUE

For Delcid, Built Blue is reflected not only in what someone accomplishes, but also in how those accomplishments are used to serve others. Being Built Blue means working hard, continuing to grow, and using what she has learned to help others. As a registered nurse caring for patients and serving her community, Delcid continues to put those values into action every day.

Her journey from Woodbridge High School to a career devoted to caring for others demonstrates how the lessons learned as a Blue Raider can extend far beyond graduation. Jocelyn Delcid is *Built Blue*—and she is using that foundation to make a difference in the lives of others.
