Dan E Pike posted a message

To: Brad Davis, Dan E Pike

Good evening, Brad. Per our conversation here are the issues with the bleachers at Paul School:

- 1) No aisles. Federal safety and fire codes require foot level aisles within every bank of bleachers to allow for safe, proper egress.
- 2) Aisle handrails - A two line handrail is required in the center of all egress aisles.

I know there is some discussion about grandfather clauses protecting your district from liability. It is my opinion that this would NOT stand up in a liability suit. I come to this conclusion for several reasons:

- a) The codes we are discussing are too old. There have been egress aisle codes for bleachers for over 40 years.
- b) At any point in time that you repaired your bleachers, A lawyer would say you should have also brought them up to code. Similar to a situation in your home, when you might upgrade your bathroom, you are required to bring that bathroom up to code at that time. Once you start your renovations, you can not turn a blind eye to the code violations.
- c) Negligence - In the case of an injury suit, a lawyer would say that, this many years into using these bleachers, knowing they are out of code, it is negligent that they were not brought up to a safe, code compliant status.

I hope this helps clear up some of our discussion. Let me know if you have any questions.

Dan E Pike
