Naselle Grays-River Valley Junior/Senior High School
793 State Route 4
Naselle, WA 98638

Dear Naselle Grays-River Valley Junior/Senior High School,

Each year, Schweitzer Engineering Laboratories (SEL) hosts a corporate giving program called the SEL School Donation Program. This program allows every SEL employee worldwide to select an educational institution of their choice to receive a \$100 donation from SEL. We ask that you use these funds to help inspire your students to develop a lifelong love of learning in math and science.

We are delighted to inform you that **1** SEL employee(s) chose your school during the 2025 program. Please accept this donation of **\$ 100** from SEL on their behalf. A complete list of SEL employees who selected your school is enclosed. *Please note, this check is valid for 180 days from the date printed on the check. We appreciate your efforts to deposit this check as soon as possible.*

Year after year, schools share how they use the money received from the SEL School Donation Program. Projects, activities, and supplies—from STEM nights and club field trips to microscopes and LEGO bricks—are just a few examples of how schools have used these funds. We would love to learn how your school uses this donation. You can share how you used these funds by sending a note and/or photos to program manager Amberly Wernecke at school_donations@selinc.com.

SEL is a high-tech manufacturer headquartered in Pullman, Washington. We invent, design, and build products in the USA that protect power grids around the world. We are committed to developing the next generation of innovators and inventors through the support of science, technology, engineering, and math education.

Thank you for your dedication to providing a high-quality education to our students!

Warm regards,

Edmund O. Schweitzer, III
Founder
