Carl Dolente
Superintendent/Chief Educational Officer

Wayne Knight
School Business Administrator

June 24, 2025

Dear Cumberland Regional High School Community:

As part of our continued efforts to protect the health of our students, faculty, and staff, the Cumberland Regional School District recently tested our school's water supply for lead. We are pleased to report that all drinking water at Cumberland Regional High School tested within safe levels. This notice is being provided in accordance with Department of Education regulations.

Following instructions given in technical guidance developed by the New Jersey Department of Environmental Protection, the district identified and tested all 101 water outlets in the Cumberland Regional High School building. No drinking water fixtures, or food preparation outlets tested above the lead action level established by the US Environmental Protection Agency for lead in drinking water (15 µg/l [ppb]).

A full report of testing results from each outlet at the school is available on the district website (www.crhsd.org/leadtesting) and at the high school main office for inspection by the public during business hours. For more information on the health effects of lead and reducing lead exposure in your home, visit the EPA's website at www.epa.gov/lead, call the National Lead Information Center at 800-424-LEAD, or contact your health provider.

Sincerely,

Carl Dolente
Superintendent
