Dear Parents and Guardians,

In this age of technology and its advancements, it is common practice for school districts to create and administer Acceptable Use Policies and Regulations to govern the use of technology within the school system.

The Clark Public School District has created such a policy as a means of protecting our students and keeping you as parents and guardians informed about the utilization of the computer network, computer, and technological resources that support our instructional programs. I am kindly requesting that you read and discuss the Acceptable Use Policy and Regulation (#2361) which are posted on the homepage of our district website: www.clarkschools.org under "Board of Education" and then "Bylaws, Policies, and Regulations." This policy and its accompanying regulation govern the use of district technological resources.

After you have had the opportunity to read the Policy and Regulation and to discuss them with your child/children, please electronically sign the Acceptable Use and Internet Permission/Non-Permission Form within our Genesis student information system which is required for each student in order to gain computer/technology privileges. We will deny a student access to the network, computers, and technological resources until a signed form has been submitted through Genesis.

The use of technology as an instructional resource offers valuable benefits to our students. We anticipate that, with your support and cooperation, we can reap the benefits of this valued instructional vehicle and prepare our students to learn technological safety and subsequently learn and flourish in this digital age.

If you have any further questions regarding the Acceptable Use Policy and Regulation, please feel free to contact your child's principal. Should you have questions about electronically signing the form or how the Internet will be utilized in your child's classroom, please contact his or her teacher.

In the event that you do not have access to the Internet from your home, please stop by our Public Library in order to gain computer access. Thank you very much for your attention to this important and timely topic.

Respectfully yours,

Edward Grande
