Technology Integration Specialist

- South Bristol School, a small rural PK–8 school, is seeking a skilled and adaptable Technology Integration Specialist to manage and support the school's technology systems, infrastructure, cybersecurity, and instructional technology needs.
- This position supports day-to-day technology operations including network systems, student and staff devices, Google Workspace administration, cybersecurity, educational software, classroom technology, and troubleshooting. The role also collaborates with administration on technology planning, compliance, and long-range system improvements.
