Logging into Edgenuity

STEP 1 – Check your students school Google Account

By now, you should have received an email from Mid-Del Schools with your students Mid-Del Google email (Gmail) account. Example: <username>@mid-delonline.net

To log into this account, you can go to either http://mail.mid-delonline.net/ or www.google.com and login. You will need to enter the full email address as the username.
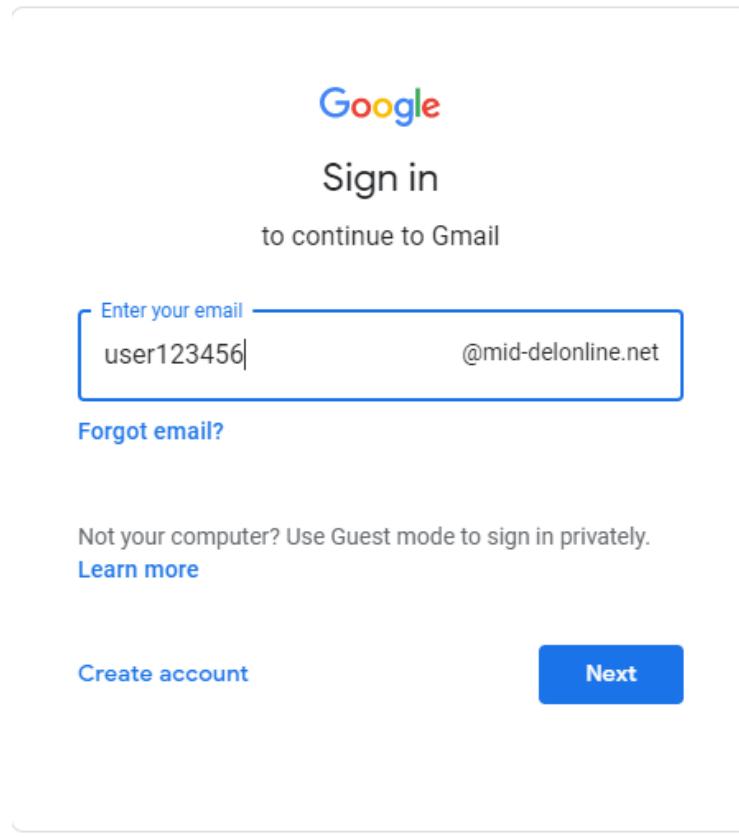

The password is currently set to the students birthday in the following format – mmddyyyy . Example: December 3, 2002 would be 12032002. After successful login, it will prompt you to reset it.

Note: **This is not the password to Edgenuity**, just the student school Google Account.

STEP 2 – After logging in successfully to the students Google account, you should find an email in the inbox with your student's login information, and links from Edgenuity. Read the email and follow the links to gain access.

If you do not see an email from Edgenuity in the inbox of the above account, follow the steps below.

Go to the appropriate website below based on your student's grade level:

For Elementary grades K-5 use: https://sislogin.edgenuity.com

For grades 6 - 12: https://auth.edgenuity.com/Login/Login/Student

Click on "Forgot your password?". Enter your student's school google email for the username and submit. This should trigger an email to their school Google account with password reset instructions. If you still need your student's email information, please reply with the student's name, grade, and school site.
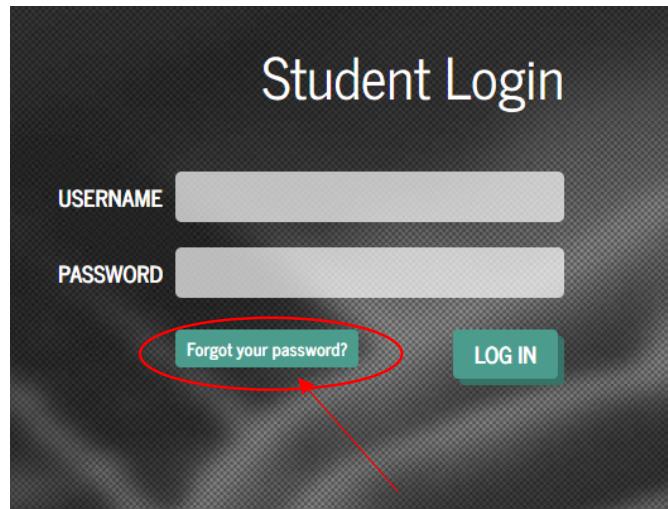

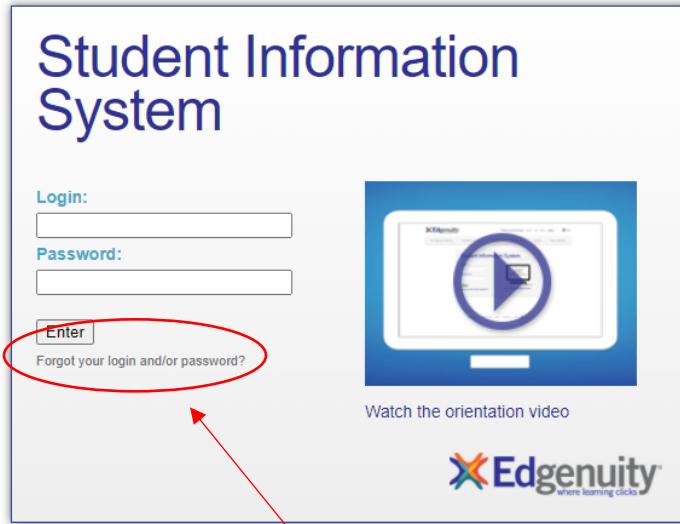

If after completing these steps, and you have not been successful in gaining access to your Edgenuity account, please email edgenuityquestions@mid-del.net with the following information:

Student First and Last Name

Grade Level

Parent First and Last Name
