Macks Creek R-V Annual Performance Report

The Missouri Department of Elementary and Secondary Education (DESE) recently released the Annual Performance Reports (APRs) for last school year (2024-25). This information provides feedback relative to progress to meet the Standards and Indicators in the sixth version of the Missouri School Improvement Program (MSIP 6). MSIP is the state's system for accrediting local school districts. It outlines expectations for school practices and student outcomes, with the goal of each student graduating ready for success in college, career, and life. The 2025 APR is the fourth APR generated under MSIP 6. Our APR for 2022-23 was 98% in continuous improvement and 52.5% in performance (for a combined score of 65.3%). Our APR for 2023-24 was 93.3% in continuous improvement 61.3% in performance (for a combined score of 71.3%). Our recently released APR for 2024-25 was 100% in continuous improvement and 60.6% in performance (for a combined score of 72.4%).

Notable gains last year include:

- Students in the elementary school have reached the target for academic growth in Mathematics, earning 100% of these APR points. Our elementary students are also on-track for academic achievement in Science, earning 75% of these APR points.
- In our district's Continuous School Improvement plan we set a goal of improving annual gains in assessment scores by 3%. The elementary is excited to announce our students made 5% gains in their MAP scores last year.
- Students in the middle & high school are on-track for academic achievement in social studies, earning 75% of these APR points and are on-track for academic growth in College & Career Ready Assessment. Many of our students are enrolled and excelling in dual-credit courses through our partnership with State Fair Community College. Macks Creek students are able to graduate high school with an Associate's Degree from State Fair. Additionally, our students are taking advantage of opportunities to earn industry

recognized credentials in fields such as Information Technology, Healthcare, Business and Finance, Skilled Trades (like welding and mechanics), Project Management, and Manufacturing.

- High school graduates met the target for the 5-year graduation rate achieving 100% and our recent alumni are also demonstrating success in their post-high school college & career endeavors, as indicated by the achievement of 100% in the area of graduate follow-up.
- Overall academic performance in high school has improved from 53.4% in 2023 to 60.7% in 2025.
- The district was awarded 100% of points in continuous improvement.

Students in Mrs.Green's 2nd Grade Class work on writing skills with their jellyfish project.

Our current APR results, compared with prior year results, indicate we are making gains::

2025 MSIP 6 Annual Performance Report (APR) Year 4			
The 2025 APR includes points for both performance and continuous improvement standards.			
	Points Possible	**Points Earned**	**% Points Earned**
Performance:	132.0	80.0	60.6%
Continuous Improvement:	60.0	60.0	100.0%
Total:	192.0	140.0	72.9%

In an effort to raise achievement, we continue to incorporate a variety of research-based programs including an accelerated learning approach which is a student-centered method that uses diagnostic assessments to identify specific knowledge gaps which our teachers utilize to integrate the necessary skills directly into the grade-level curriculum. Career Ladder, a program in which teachers may supplement their salary by working 50, 75 or 100 hours outside of their normal contract time, led to an increase in the number of students participating in after school tutoring last year. However, so far this school year we have seen a decrease in the middle and high school in the number of students taking advantage of this free service. Parents are encouraged to have students participate. Tutoring is available after school until 5:00 every day.

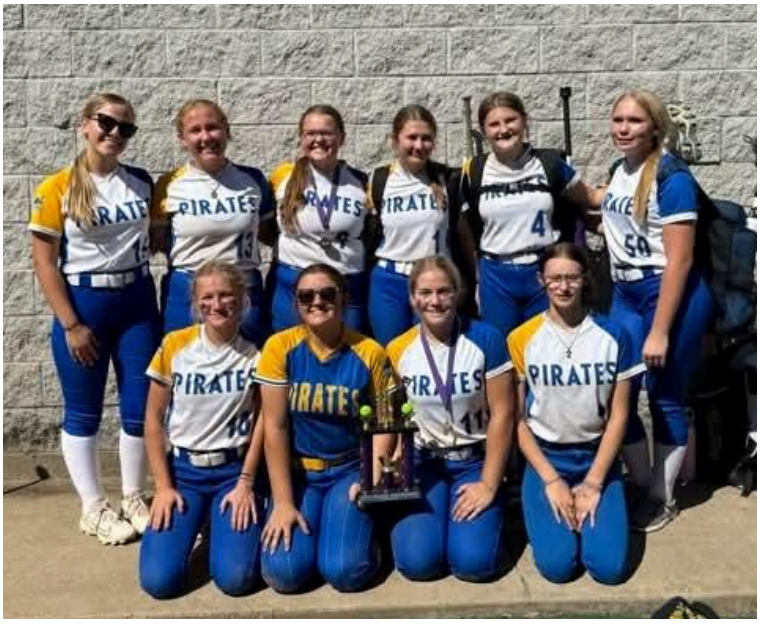

Macks Creek Juniors took the ASVAB in September as one of the many aptitude tests taken for post-secondary planning.

Our district continues to utilize Response to Intervention (RTI) strategies for math, science, and English. This allows teachers to work closely with small groups of students who need extra help, helping them master concepts and fill in learning gaps. For students who have already mastered the material, we offer enrichment opportunities to explore more advanced topics. Additionally, the district is using Northwest Educational Assessments to track student growth and tailor support to their needs. These assessments are aligned with Missouri Learning Standards and help predict student performance on state tests. Last year, the district expanded these tools to include science as well.

Each year, 70% of our Annual Performance Report (APR) is based on the results from the Missouri Assessment Program (MAP) for grades 3-8 and End of Course (EOC) exams in high school. These tests are very important, and we want to encourage students to give their best effort. To support this, our district offers monetary rewards to students who achieve proficient or advanced levels on these state tests. Additionally, students who improve their scores, such as moving from below basic to basic or from basic to proficient, can also earn cash incentives. We

also host an exciting Academic Week before testing to help students feel prepared and reduce any anxiety. This week is filled with engaging activities and hands-on practice, along with reminders about effective test-taking strategies.

Extra-curriculars such as archery, baseball, basketball, cheerleading, cross country, softball, track & field and wrestling ensure our students have opportunities to succeed outside of the classroom.

Students who show effort, maintain good attendance, and have minimal discipline issues are eligible for quarterly incentive trips throughout the year. These initiatives are designed to motivate and reward our students for their hard work and dedication.

Our school district is committed to taking steps every day to improve the effectiveness of our programs and improve the quality of every student's educational experience. It is for this reason we developed the Macks Creek Continuous School Improvement Plan or CSIP. The full document, which is available here, establishes priorities in the areas of teaching & learning, climate & culture as well as leadership & mentorship. This document and the progress toward the goals and objectives contained within it, is a topic at every regular meeting of the Board of Education.

Student organizations play a vital role in our student body. Programs such as FFA, FBLA, FCA, NHS, and Student Council allow opportunities for students to be involved in many different areas of interest.

Despite an emphasis in increasing student attendance last school year, the high school experienced a decline resulting in a 25% loss in APR points in this area. Attendance is a major focal point for students. Students who miss school, regardless of the reason, not only forfeit essential learning opportunities but also fail to build habits crucial for future career success.

This year marks our 4th year of MSIP 6, and we are excited to continue working closely with everyone in our school community to support our students. We truly appreciate everyone who contributes to our students' growth and development as we work towards our mission of “developing lifelong learners to be responsible citizens, ready for success in an ever-changing world.” We encourage families to prioritize their children's education by ensuring they attend school regularly and support learning at home. By implementing our CSIP and collaborating daily for our students' benefit, we are confident we will continue to see improvements in our APR score in the coming years!
