Job Description:

The Science Teacher for Grades 7–12 is responsible for delivering engaging, standards-aligned instruction in middle and/or high school science courses. This role supports student academic growth by fostering scientific inquiry, critical thinking, and real-world application of scientific concepts in a safe and inclusive learning environment.

Essential Duties and Responsibilities

- Plan, prepare, and deliver high-quality science instruction aligned with state and district standards
- Teach assigned science courses, which may include general science, life science, physical science, biology, chemistry, physics, or environmental science
- Develop lesson plans that incorporate inquiry-based learning, laboratory investigations, and hands-on activities
- Create and administer formative and summative assessments to monitor student progress
- Analyze student data to inform instruction and provide targeted support or enrichment
- Maintain a safe, organized classroom and laboratory environment, following all safety protocols
- Differentiate instruction to meet the diverse learning needs of students
- Integrate technology and instructional resources to enhance learning
- Communicate regularly with students, parents/guardians, and colleagues regarding student progress
- Collaborate with other educators, instructional coaches, and administrators
- Participate in professional development, staff meetings, and school events
- Maintain accurate student records, grades, and attendance
- Support school policies, procedures, and initiatives

Salary & Benefits:

- Competitive salary based on experience and district pay scale.
- Comprehensive benefits package, including health insurance, retirement plans, and professional development opportunities.
