Senior Spotlight

Eden Tourville

Eden joined DCS in 2024, following in her brother's footsteps after hearing how much he loved his experience. During her time at DCS, Eden especially enjoyed art class—a space she found refreshing, creative, and full of laughter, made even more meaningful by the encouragement of Mrs. Schmidt. She credits Mrs. Lorenzen with her love of the em dash, and recognizes the impact she had on her life in teaching her how to work harder and expect more of herself. She is grateful for the friendships she's formed and the discipline she's developed along the way. Eden cherishes memories from school trips like Yellowstone and Washington, D.C., and will miss her teachers and classmates dearly. After graduation, she plans to attend Walla Walla University in Washington and looks forward to new experiences, new friendships, and the freedom of a more flexible schedule, trusting God's guidance through the people He has placed in her life.

Katherine Lott

Kate became a part of DCS her eighth grade year when her family found both a strong academic fit and a welcoming community. During her time at Damascus Christian, Kate has loved many classes—from thoughtful Bible discussions and Shakespeare to shared moments in ASL and Algebra—making it nearly impossible to choose a favorite. She is especially grateful for the kindness and patience of teachers like Mrs. Sarkissian, whose support made a lasting impact on her. Kate values the close-knit community at DCS and cherishes many memories with her senior trip to Yellowstone being at the top of the list, where learning alongside friends amid God's creation was especially meaningful. She will miss the relationships she's built, particularly with her class and her morning conversations with Mrs. Schmidt. After graduation, Kate plans to attend college and looks forward to what comes next.

Lily Davis

Lily, along with her brother, joined DCS her seventh grade year and quickly found a place where she could grow academically and personally. She especially enjoyed science classes—particularly learning about cloud formations with Mrs. Clear—which sparked a deeper passion for understanding God's creation. Lily is grateful for the many teachers who went above and beyond to support her, encouraging her curiosity, perseverance, and growth. She values the relationships she has built at DCS, the structure school provided, and meaningful experiences like the Yellowstone trip, where learning came alive through hands-on discovery. After graduation, Lily plans to take a gap year to work and explore her future, with interests in either the trades or a science-related field. As she looks ahead, she is excited to build her life, grow in faith, and step confidently into adulthood.
